IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

Application of Reinhard Zeisig et al.

Serial No. 09/873,952

Filed June 4, 2001

For MEANS OF TUMOR THERAPY

Attorney's Docket 0107-032

Commissioner of Patents
Washington DC 20231

Sir:

Enclosed herewith is an information disclosure form, together with a copy of the references identified therein.

European patent application No. 359,981 relates to a pharmaceutical composition for antineoplastic therapy employing proteinkinase inhibitors, in combination with lipids, lipidanalogs, cytostatics or compounds that inhibit phospholipase.

European patent application No. 152,379 relates to a method for producing pharmaceutical compositions of aqueous dispersion-containing unilamellar liposomes of an amphipatic compound having a biological effect, and a phospholipid or analog lipid.

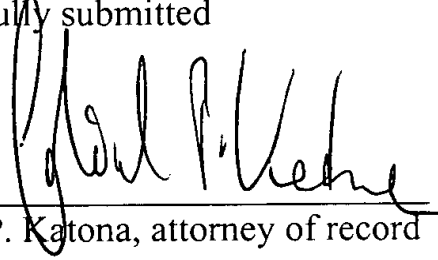

German patent No. 4,408,011 relates to a liposomal tumortherapeutic agent from etherlipids, and alkylphosphocholines, their preparation and use.

German patent No. 4,132,345 relates to a drug composition for intravenous application of lytic agents in the form of unilamellar liposomes.
